

SANERNOW

INTEGRATED VULNERABILITY MANAGEMENT & PATCH MANAGEMENT SOLUTION

Part of Industry's First Integrated and Automated
SanerNow Cyberhygiene Platform

www.secpod.com

Organizations are still not managing and mitigating vulnerabilities despite it being a critical business goal. Most cyber threats can be kept in control with a proactive vulnerability and patching process.

As per an article by [Infosecurity](#), most organizations take an average of 100-120 days to patch detected vulnerabilities. This enormous time lag between vulnerability detection and remediation opens several doors for attackers to invade. Vulnerability assessment and remediation should be an everyday task rather than a weekly, bi-weekly, monthly, or quarterly one.

The gap between vulnerability detection and remediation are due to lack of integration, automation, and orchestration. This gap can be eliminated with an integrated vulnerability and patch management solution, which will help you to detect, assess, prioritize, and instantly remediate vulnerabilities in the network from a single console.

An integrated approach is more effective and efficient in eradicating threat vectors and strengthening your endpoint security posture.

SecPod SanerNow Integrated Vulnerability & Patch Management Solution

SecPod SanerNow's integrated Vulnerability and Patch management solution thoroughly assesses your endpoints' landscape, rapidly detects vulnerabilities, precisely prioritizes, and instantly remediates them with industry's fastest, most accurate, always-on, and continuous approach.

Leveraging over 100,000+ vulnerability checks in our in-built SCAP repository, intelligent scanning algorithm, efficient agent-server model, and integrated patch management solution, we provide you with advanced vulnerability assessment and mitigation capabilities within a single pane of glass.

With SanerNow, you can remotely automate the end-to-end tasks of vulnerability management and patch remediation from a centralized console, thereby reducing the complexities of using swivel chair interfaces for managing vulnerabilities.

SanerNow is trusted by organizations spanning from start-ups to large enterprises worldwide for its unique approach to prevent security threats, reduce threat exposure, and orchestrate cyber-hygiene.

Reduce security gaps with an integrated Vulnerability and Patch management solution from within a single pane of glass

Fastest ever comprehensive and accurate vulnerability scanning (less than 5 minutes)

Detect the vulnerabilities in your network in less than 5 minutes with the industry's most comprehensive and rapid scanner.

Built on the world's largest SCAP repository with over 100,000+ vulnerability checks

Leverage our industry renowned SCAP feed with over 100,000 vulnerability checks, precisely scan and identify vulnerabilities, and secure your endpoints

Reduced risk exposure with integrated patch remediation

Take an integrated approach to patch management and identify, prioritize, and automatically remediate vulnerabilities from your SanerNow dashboard.

Advanced Automation Techniques

You can accomplish vulnerability and patch management tasks through advanced end-to-end automation using a centralized cloud-based console and an intelligent multi-functional agent.

Tighten endpoint security with SanerNow's Integrated Vulnerability & Patch Management Solution

Rapid and continuous vulnerability scanning

Scan and detect the vulnerabilities in your endpoints in less than 5 minutes, with SanerNow's intelligence-augmented (IA), efficient scanning algorithm. Run your always-on vulnerability management program to gain real-time visibility and control of your attack surface.

Efficient Vulnerability and Patch Management through intelligent multi-function Agent-Server model

Establish a live connection with the server and instantly detect new vulnerabilities with Saner Now's intelligent agent-server model. Use the lightweight, powerful, and multi-function agent installed at your endpoints to immediately remediate vulnerabilities based on the severity, thereby improving your organization's cyber-hygiene.

Perimeter-less cloud-based management

Efficiently manage vulnerabilities and patches across your network, with a single, centralized, cloud-based console. Use SanerNow for an effective remote vulnerability and patch management approach built for globally distributed organizations.

Accurate prioritization with high-risk vulnerability identification

Use SanerNow to thoroughly identify vulnerabilities and prioritize them based on their severity level using the CVSS scoring model. Prioritize based on calculated risk assessment to reduce your organization's risk exposure.

Integrated and automated vulnerability detection and patch remediation

Remediate software vulnerabilities instantly using SanerNow's integrated and automated patch management approach. Eliminate the complexities faced by using swivel chair interfaces in executing different tasks of vulnerability management.

Seamless cross-platform and third-party applications patching with instant support for latest patches

Get instant support for latest patches for all three operating systems (Windows, MAC, Linux). Also, get an in-built patch repository with a vast collection of commonly used third-party applications like Adobe, Java, Google, VMware, etc.

360-degree visibility with unified insightful dashboards

Ease of discovery based on severity, age, device type, and exploit potential level with SanerNow's continuous next-gen vulnerability management. Stay ahead of the threat curve, and view and eliminate risks with SanerNow's comprehensive and actionable dashboard.

Zero-disruption patching with pre-tested and verified patches, with ability to rollback

Testing is an essential step before introducing a new patch to the organization's live network to ensure compatibility. SanerNow can test patches on customized test groups before deploying them to devices on the entire network. You can also rapidly un-patch updates with SanerNow's Rollback feature to guarantee near zero-down time.

About SecPod

SecPod is leading provider of endpoint security and management solutions. SecPod (Security Podium, incarnated as SecPod) has created revolutionary SanerNow platform and tools that are used by MSPs and enterprises worldwide. SecPod also licenses security technology to top security vendors through its SCAP Content Professional Feed.

The SanerNow Platform

SecPod SanerNow is a Unified Endpoint Security (UES) and management solution that ensures cyberhygiene by automating and orchestrating measures to safeguard your enterprise endpoints from cyber attacks.

The major features of SanerNow include,

- Patch Management,
- Vulnerability Management,
- Asset Management,
- Endpoint Management,
- Compliance Management
- Endpoint Threat Detection & Response
