SANERNOW FOR

# SECURITY, RISK, AND COMPLIANCE

[www.secpod.com](http://www.secpod.com)

Today, security and compliance are not the same as they were a decade ago. In the past, software vulnerabilities were few. They were manageable on a smaller scale, even in huge enterprises with multiple devices across different locations. Today, although IT security has evolved, it has also complicated and diversified. Multiple security solutions built to carry out specific functions are eating into the time and ease of security risk management.

Cyberattacks can and should be stopped before they happen. However, today's risk detection and remediation tools simply lack the comprehensiveness and attention to detail in their design. They are either limited in their capabilities or offer extremely specific functionalities that are insufficient in the bigger context of security. What organizations need today is an all-in-one security platform designed to detect risks, remediate them, and demonstrate compliance with security benchmarks.

## SanerNow for Security, Risk, and Compliance

SanerNow offers a combination of products that take security, risk, and compliance management to the level they need to be. The solutions offered helps enterprises manage their IT assets, detect risk, remediate them, and demonstrate compliance with security policies. These four products ensure the best possible security posture in your environment: SanerNow Vulnerability Management, Patch Management, Compliance Management, and Asset Management.

SanerNow is powered by our homegrown, world's largest, SCAP-compliant vulnerability intelligence database. With 130,000+ security checks and a false positive rate of 0.001%, SanerNow detects risks with the highest accuracy. Integrated and automated patch management remediates the detected vulnerabilities. Security compliance management capabilities scan devices and harden endpoints to comply with HIPAA, PCI, NIST, ISO, and custom security policies. As a final envelope, asset management capability gives you visibility and control over all hardware and software assets in the inventory.

## The Best of Vulnerability Assessment, Patching, Compliance, and IT Asset Management Under One Roof

### **Robust Security Framework in One Unified Platform**

Tired of multiple disconnected tools? Not anymore! With SanerNow, you can detect and remediate attack vectors and ensure security compliance from a single cloud-based console. Build a robust security framework for your organization and oversee everything from one place.

### **Best-in-class Security Posture Guaranteed with The Most Trusted Security Intelligence**

SanerNow is powered by our homegrown, world's largest, SCAP compliant security intelligence feed with 130,000+ vulnerabilities. With false positive rates of 0.001%, the SanerNow platform comprehensively detects vulnerabilities across all endpoints and network devices.

### **Experience The Leading Edge of Security Innovation**

Leverage the leading edge of security innovation with the fastest scanning, end-to-end automation, and intelligent algorithms. Strengthen your security posture with the industry's ground-breaking platform.

### **One Powerful Agent for All Security Tasks**

A single lightweight agent installed in endpoints carries out all security tasks in the respective endpoints and other network devices. It also acts as a network scanner and detects the risks in the network devices, saving costs on additional investment. All detection and remediation tasks are executed in the background with absolutely no disruption to end-users' productivity.

# Manage Vulnerabilities, Automate Patch Management, Ensure Compliance, and Manage IT Assets

## SanerNow Vulnerability Management

Scan, detect, assess, prioritize, and remediate vulnerabilities and risks in enterprise endpoints and network devices.

- Industry's fastest, zero-disruption scans that complete in under 5 minutes
  - Powered by the world's largest (and growing) vulnerability intelligence database with 130,000+ vulnerability checks built-in
- 

## SanerNow Patch Management

Automate the end-to-end tasks of patch management starting from scanning, detection, prioritization, download, testing, and scheduled deployment.

- Patches for all major OS versions in Windows, MAC, Linux, along with 200+ third-party applications
  - Latest patches are made available within 24 hours of release by the supported software vendors
- 

## SanerNow Compliance Management

Scan and detect non-compliant endpoints, harden endpoints to restore security compliance, and generate audit-ready reports.

- Out-of-the-box support for HIPAA, PCI, NIST, ISO. Custom security policies can also be created
  - Continuous scanning capabilities to ensure continuous compliance in real-time
- 

## SanerNow Asset Management

Monitor and track every hardware and software asset across your network with complete visibility and control.

- Blacklist or whitelist untrusted or malicious software to ensure security
- Track and manage software licenses in your asset inventory

## About SecPod

SecPod is an endpoint management, security, risk, and compliance technology company. SecPod (Security Podium, incarnated as SecPod) has created the revolutionary SanerNow platform and tools that are used by MSPs and enterprises worldwide. SecPod also licenses security technology to top security vendors through its SCAP Content Professional Feed.

## The SanerNow Platform

SecPod SanerNow is a cyberhygiene platform that automates and orchestrates measures to safeguard your enterprise devices from cyber attacks. The major applications of SanerNow includes:

- Patch Management
- Vulnerability Management
- Asset Management
- Endpoint Management
- Compliance Management
