TRL Krosaki
Simplifies Compliance &
Vulnerability Remediation
with SanerNow

The task of achieving compliance for any organization is not as easy as it sounds, and keeping your organization secure while doing so is even harder. And with more and more devices, remote and on-site, the task of securing your network is Herculean.

With sensitive proprietary data in its network and compliance audits always hovering over them, the IT Security team at TRL Krosaki had the same exact problem in front of them. Even with multiple tools and services, effectively improving the organization's security posture while getting ready for compliance was not a smooth and easy process.

Continuous Compliance & Rapid Vulnerability Management with SanerNow

Vulnerability Management & Continuous Compliance

The biggest business need for TRL Krosaki was an integrated security solution that could effectively detect vulnerabilities and security risks while enforcing compliance for ISO 27001 audits.

Further, another critical requirement was a single integrated solution that could perform all the required tasks and could be managed easily. This would make the solution cost-effective, efficient, and easy to maintain as well.

What TRL Krosaki needed was an enterprise-grade integrated vulnerability management solution to fit its security stack!

How TRL Krosaki Harnesses the Power of SanerNow for Speedy & Effective Vulnerability Mitigation

To address the business need, TRL Krosaki engaged with SecPod's SanerNow Advanced Vulnerability Management, an end-to-end vulnerability management suite that could detect, assess, prioritize, and remediate vulnerabilities while enforcing ISO 27001 compliance, among others.

With SanerNow supporting all network devices and all major OSs, the process of implementing it was quick and easy. Further, a single simplified dashboard with intuitive UI also made it easy for the IT Security team to learn.

Overview

Business

TRL Krosaki is a leading manufacturer of a wide range of products like Basic, Dolomite, High Alumina, Monolithics, Silica, Taphole Clay, and RH Snorkel refractories and is one of the biggest refractory manufacturing companies in India. Certified with Integrated Management Systems (IMS), the company also provides technical support to its customers as well.

The Business Challenge

Effective Vulnerability Management and Achieving Continuous Compliance for ISO-27001

### The Solution

SanerNow Advanced Vulnerability Management

With a large attack surface, using multiple tools to secure the network while enforcing compliance for ISO 27001 was incredibly challenging

The compliance enforcement and audit-ready reports were so effective that our external audit team was very impressed!

– Bivudatta Sahoo
Infrastructure Manager

SanerNow smoothly fits inside the organization's security stack and fulfilled the requirement of

- Integrated vulnerability scanning and remediation.
- ISO-27001 and other compliance scanning and enforcement.
- Audit-ready reporting for compliance.
- Unified single solution replacing ineffective siloed solutions.
- Streamlined and simplified vulnerability management.
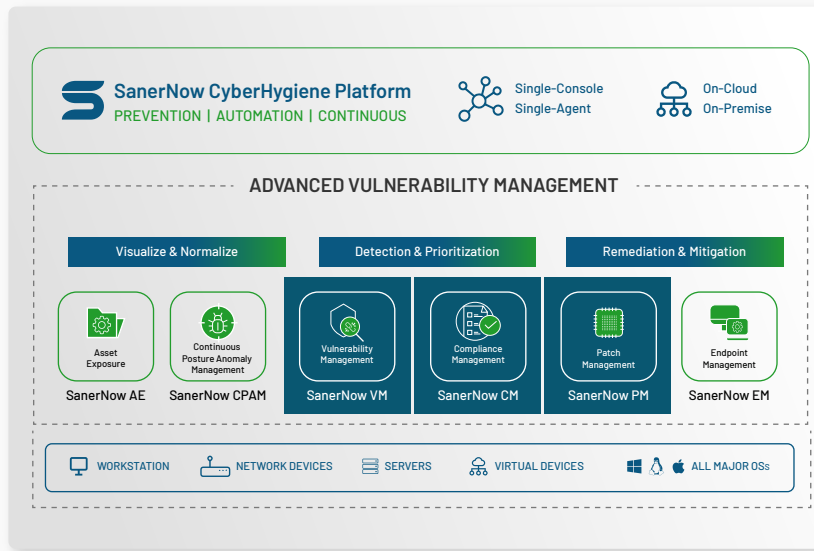

When asked why SanerNow, Bivu wholeheartedly replied, "While the product was feature-rich, affordable, and easy to use, the cherry on top was the smooth implementation process and excellent customer support, making it a very easy decision when compared to other products

Reducing Costs, Eliminating Vulnerabilities and Multiple Solutions with SanerNow

With SanerNow, end-to-end vulnerability management was simplified, and enforcing ISO 27001 compliance was easy. TRL Krosaki breezed past its compliance audits and is able to strengthen its organization's security posture continuously.

SanerNow helped TRL Krosaki improve the speed and efficiency of detecting and remediating vulnerabilities and also improved the productivity of the users as well with close to zero downtime in IT operations.

With SanerNow, TRL Krosaki was able to:

- Unify and Simplify Vulnerability Detection & Remediation
- Achieve Continuous Compliance
- Enhance and Speed Up Patching
- Improve Productivity with Zero Downtime

With continuous scanning to detect vulnerabilities and other security risks and integrated remediation in place, a centralized and unified dashboard allowing to maintain and manage all security risks, TRL Krosaki was in safe hands.

About Secpod

SecPod is a cyber security technology company with a mission to prevent cyberattacks on organizations. Our Advanced Vulnerability Management platform helps implement cyber hygiene measures, making it more difficult for attackers to access systems and companies' vital information.

SecPod SanerNow is a Cyber Hygiene platform providing continuous visibility to IT infrastructure. It identifies vulnerabilities, misconfigurations, and security risk exposures, mitigates loopholes to reduce the attack surface, measures compliance, and helps automate remediation
