04 OPTIMISE

02 MANAGE

03 MONITOR

Fast-growing business environments require establishing a balance between optimizing IT asset scaling, with stability, security, and reliability, while managing ever-tightening IT budgets. Maximizing the use of IT assets across the asset life cycle is a necessity, and establishing a single-pane-of-glass view across the asset landscape will help reduce the chaos of multiple interfaces for asset tracking and management.

Ensuring a real-time view across the IT Asset landscape allows you to manage and retire legacy or underperforming assets, helping you avoid significant penalties, and reduces overall IT costs across acquisition, optimal usage, and productivity, while also enhancing security, and system flexibility.

A single-pane-of-glass view aids data-driven decision making to establish system compliance with optimal licensing and usage, and system change tracking, highlighting potential vulnerabilities and security gaps.

Choosing the right Asset Exposure solution can increase an organization's return on investment in asset investments.

SecPod SanerNow Asset Exposure

The SecPod SanerNow Asset Exposure (AE) platform helps you with an aggregated view of your asset data, with automated, audit-ready reports. It helps automate asset discovery and eases asset lifecycle management, using the SanerNow smart agent.

SanerNow AE helps you accurately determine IT asset usage using hardware or software licensing information and helps identify rarely used and outdated assets and applications. These pre-defined parameters help you correlate and optimize your IT asset tracking, software utilization, and metering. SanerNow AE also allows you to whitelist

and blacklist applications enabling a firm security policy and posture across your IT landscape. The single-pane-of-glass view assures transparency across your IT asset monitoring, visualization, and troubleshooting. Its 24x7 operation supports you in securing and managing IT assets.

Achieve real-time visibility and control over your IT assets using SecPod SanerNow AM

Accurate Software usage Data using the Smart Lightweight SanerNow Agent

A smart light-weight agent across the devices helps you discover essential software metrics like rarely used and outdated assets or applications. These metrics enable strategic decision making based on IT-asset usage, cost control, and license optimization.

Uninterrupted live IT asset scanning

SanerNow AE accurately detects remote and local IT assets providing single-pane-of-glass visibility with quick and real-time scanning for comprehensive views and asset transparency.

Cloud-first solution integrated with the SanerNow CyberHygiene Platform

The Asset Exposure Platform is avail-able in the cloud. It is integrated with the full suite of SanerNow Continuous Vulnerability & Exposure Management for end-to-end endpoint security and management requirements, including patching, vulnerability manage-ment, compliance management, endpoint management, and threat detection and response. This integrated platform will provide you with comprehensive visibility and control over your organization's endpoints, helping you achieve your endpoint security goals.

Automated audit-ready reports

SanerNow AM provides a wide range of automated and customizable IT reports ensuring any-time audit-readiness.

Continuously and efficiently monitor and manage your IT asset inventory

Regular asset scans to detect hardware or software change

The SanerNow Smart Light-weight agent enables continuous or on-demand asset scanning across your endpoints, instantly detecting, and flagging any deviation in the hardware and software settings.

Hardware and software inventory

Gather detailed software and hardware inventory and usage metrics data using SanerNow's Smart threat-intelligence, Lightweight agents, to generate standards-compliant, audit-ready reports instantly.

Track software usage metrics

Track optimize and plan software asset purchase and utilization using software usage metrics, and identifying rarely used, outdated applications or software, across all your endpoints. Its continuous mapping and asset updating will help you with effective asset management.

Real-time Asset Detection

Track and manage asset movements in your network, including newly added, or uninstalled hardware or software from your network with the SanerNow unified Asset Exposure dashboard.

Monitor and Manage Vulnerable Assets

Detect the availability and entry of any malicious or vulnerable hardware and software across your enterprise endpoints. Use the SanerNow console to flag and blacklist malicious or outdated software.

Manage Asset License Details

Ease and automate tracking of licensed OS, network details, third-party applications, and hardware. Get unobstructed views and drill down to the details of each instance from the SanerNow AE dashboard, leveraging data from the installed SanerNow smart agents.

About
SecPod

SecPod is a cyber security technology company. We prevent cyberattacks. We do everything to prevent attacks on the computing environment. Our product helps implement cyber hygiene measures, so attackers have a tough time piercing through.
Our SanerNow Cyber Hygiene Platform provides continuous visibility to the computing environment, identifies
vulnerabilities and misconfigurations, mitigates loopholes to eliminate attack surface, and helps automate these routines. Our product philosophy is offering simplicity and automation to make the job of security administrators slightly better.

The SanerNow
Platform

SecPod SanerNow is a Unified Endpoint Security (UES) and management solution that ensures cyberhygiene by automating and orchestrating measures to safeguard your enterprise endpoints from cyber attacks.
The major features of SanerNow include,
❚ Patch Management,
❚ Vulnerability Management,
❚ Asset Management,
❚ Endpoint Management,
❚ Compliance Management
❚ Endpoint Threat Detection & Response
