Key Highlights

Be the leader in secure innovation.
Explore SecPod's OEM-focused solutions today.

Modern OEMs Face Complex Challenges— Here's How SecPod Solves Them

PAIN POINTS

Escalating R&D Costs

Developing security solutions is resource-intensive and requires constant updates

Extended Time-to-Market

Trying to add demanding security capabilities outside one's core competencies might leads to delays

Evolving Cyber Threats

Zero-day vulnerabilities & compliance requirements create constant risk for the OEM's client

Disconnected Tools and Processes

Managing multiple tools for security, compliance, and maintenance increases complexity and the attack surface

SECPD'S TAILORED SOLUTIONS

Tight Integration Security via SDKs and APIs

Seamless embedding of security capabilities without disrupting existing workflows.

Embedded Security within your Dashboard

Enhance your platform with built-in security features, offering a native experience.

White-Labeling SecPod's Solution

Deliver advanced security under your brand, ensuring a cohesive user experience.

Bundling SecPod's Solutions

Expand your offerings by packaging security features alongside your existing products.

HOW SECPD BRIDGES THE GAP

OEMs leverage SecPod's unified platform for security and compliance that integrates seamlessly into their existing workflows, reducing complexity, time, and cost.

What Makes SecPod the Ideal Partner for OEMs?

FEATURE BREAKDOWN

Vulnerability Management SDKs

- 1. Enable real-time detection of security weaknesses and vulnerabilities
- 2. Reduce vulnerability assessment time by up to 50%

Patch Management APIs

- 1. Automate patch creation and deployment across connected devices
- 2. Maintain seamless device performance without downtime

Compliance Automation

- 1. Industry-standard templates for NIST, ISO, PCI-DSS, and more
- 2. Avoid penalties by ensuring continuous compliance

Endpoint Security APIs

- 1. Embed proactive threat detection and protection
- 2. Real-time incident response for a fortified security posture

REAL-WORLD USE CASES

IoT Device Manufacturer

Embedded SecPod's APIs to secure their smart home devices. Achieved a 25% faster launch and 30% increase in customer trust metrics

EPP/EDR Vendors

With SecPod's ready-to-deploy solutions, they launched their enhanced product within 6 months, a 66% reduction in time compared to developing in-house

Managed Security Service Provider (MSSP)

Leveraged vulnerability management SDKs for automated client support, improving SLAs and reducing overhead costs.

Take the First Step Toward Smarter Product Security with SecPod

WHY CHOOSE SECPOD?

- 1. Proven expertise in vulnerability management, patching, and compliance for global enterprises.
- 2. APIs and SDKs designed for seamless integration into any OEM environment.
- 3. Continuous innovation to tackle tomorrow's threats today.

METRICS THAT MATTER

compliance with major standards like GDPR, HIPAA, and NIST

accuracy in vulnerability detection and patching

vulnerabilities identified daily across global infrastructures

100%

99.9%

The SecPod logo is rendered in a white, stylized, sans-serif font. The letters are bold and modern, with the 'S' and 'P' featuring unique, angular designs. The background of the entire page is a deep blue with a subtle, wavy pattern of concentric lines that create a sense of depth and movement, particularly on the right side.
